Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/814,069	Applicant(s) IONESCU, MLHAI FLORIN	
	Examiner DENNIS MYINT	Art Unit 2162	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 July 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 23, 2009, has been entered.
2. Claims 1-12 and 14-36 are currently pending in this Office Action. In the amendment filed on July 23, 2009, claims 1, 11, 12, 15, 17, 27-31, 34, and 36 were amended. Claims 1, 17, 34, and 36 are independent claims.
3. In light of amendments Applicant's explanation with respect to rejection of claim 14 under 35 U.S.C. 112 First Paragraph, rejection of said claim under 35 U.S.C. 112 First Paragraph in the prior office action is hereby withdrawn.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:
Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
5. Claims 17-32 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Art Unit: 2162

Claim 17 in line 1 recites “a computer-readable medium”. Said “computer-readable storage medium” is given the broadest interpretation to mean computer-readable media described in the Specification of the instant application. The specification on page 6 lines 1-5 in the paragraph recites “*Also, various other forms of computer-readable media may transmit or carry instructions to a computer, including a router, private or public network, or other transmission device or channel, both wired and wireless”.* As such, said computer-readable medium is directed to wireless signals and/or wired signals which are not statutory. Therefore, claim 17 is rejected under 35 U.S.C. 101 as being directed to non-statutory subject matter.

Claims 18-32 depend on claim 17 and rejected under 35 U.S.C. 101 because of their dependency on claim 17.

Allowable Subject Matter

6. Claims 17-32 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 101, set forth above.

As per claim 17, the prior art of record (Doganata in view of Inaba and further in view of Fain), alone or in combination, does not teach or fairly suggest the combination of steps as recited in the claim. Prior art of record does not teach the following limitations:

“(ii) storing the new result set associated with the search query in an offline accessible data store, and

(iii) outputting the new result set as a search result of the search

query;

(d) program code for is the search has been previously received,

(i) retrieving a previously stored result set associated with the search query from the offline-accessible data store, the previously stored result set comprising a plurality of categories each of which comprises one or more articles”.

7. Claims 1-12, 14-16, and 33-36 are allowed.

The following is the statement of reasons for allowance.

As per claim 1, the prior art of record (Doganata (hereinafter “Doganata”, U.S. Patent Application Publication Number 2003/0220913) in view of Inaba et al., (hereinafter “Inaba”, U.S. Patent Number 7054860) and further in view of Fain et. al., (hereinafter “Fain”, U.S. Patent Application Publication Number 2003/0220912)), alone or in combination, does not teach or fairly suggest the combination of steps as recited in the claim. Prior art of record does not teach the following limitations:

“(ii) storing the new result set associated with the search query in an offline accessible data store, and

(iii) outputting the new result set as a search result of the search query;

(d) responsive to a determination that the search query has been previously received,

(i) retrieving a previously stored result set associated with the

search query from the offline-accessible data store, the previously stored result set comprising a plurality of categories each of which comprises one or more articles”.

Dependent claims of claim 1, being definite, further limiting, and fully enabled by the specification, are also allowed.

As per claim 34, the prior art of record (Doganata in view of Inaba and further in view of Fain and further in view of Denny et al., (hereinafter “Denny”) (U.S. Patent Number 7082428), alone or in combination, does not teach or fairly suggest the combination of steps as recited in the claim. Prior art of record does not teach the following limitations:

“(1) determining whether an article in one of the plurality of categories has been modified after the previously stored result set was stored in the offline-accessible data store,

(2) determining whether a new article of an article type associated with the one of the plurality of categories has come into existence after the previously stored result set was stored in the offline-accessible data store”.

Dependent claims of claim 34, being definite, further limiting, and fully enabled by the specification, are also allowed.

As per claim 36, the prior art of record (Doganata in view of Inaba and further in view of Fain and further in view of Denny), alone or in combination, does not teach or fairly suggest the combination of steps as recited in the claim.

Art Unit: 2162

Prior art of record does not teach the following limitations:

“(ii) storing the new result set associated with the search query in an offline accessible data store, and

(iii) outputting the new result set as a search result of the search query;

(d) responsive to a determination that the search query has been previously received,

(i) retrieving a previously stored result set associated with the search query from the offline-accessible data store, the previously stored result set comprising a plurality of categories each of which comprises one or more articles”.
